

START HERE

E Light Electric Services, Inc. understands that our #1 asset is our employees. We know that in order to provide a quality product and the great service our customers deserve, we must begin with the people we hire.

Our goal is to have all our employees on a path to success and in doing so, they will in turn provide the best products to our customers.

NO EXPERIENCE NEEDED

The electrical construction industry has many new opportunities for those individuals interested in the electrical trade. The E Light Electric Apprenticeship Program will give you experience and a structured training process. Our approved, four-year training program combines on-the-job experience with a structured classroom environment. This format prepares you for a career as a skilled journeyman electrician and the necessary knowledge to successfully complete the journeyman electrician exam.

SAFETY MATTERS

We take pride in leading the industry in our approach to safety. We have introduced new programs and processes to improve our safety record and ensure that our employees can perform their work in an efficient and safe manner with quality and pride.
